Exposure launches new flagship 5510 integrated amplifier

Exposure Electronics is proud to unveil its new flagship 5510 integrated amplifier, designed for music lovers who want exceptional sound without the complexity of separate components.

Whether you're a vinyl enthusiast, a digital streamer, or a music lover keen to take your listening enjoyment to the next level, the new Exposure 5510 gives you the power and flexibility to enjoy music the way it was meant to be heard.

What sets the 5510 integrated amplifier apart?

Power that moves you

With 120 watts per channel, the 5510 delivers plenty of muscle to drive your speakers with authority. Expect deep, controlled bass, detailed mids and sparkling highs, whether you're listening to delicate acoustic pieces or high-energy rock.

Made for music, your way

Flexibility is at the heart of the 5510's design. Alongside six versatile line inputs, you can opt to upgrade the amplifier with a selection of phono boards (MM, MC or DS) to suit your turntable, or a plug-in DAC board for pristine digital playback. Rest assured that your amplifier will grow with your system and your music collection.

Silence where it matters

Thanks to a custom toroidal transformer with hum shield and a carefully engineered low-noise design, your music emerges from a pitch-black background, letting every detail shine without unwanted interference.

Elegant simplicity

The 5510's high-grade aluminium chassis controls resonance and looks stunning in any room. Its crisp white OLED display offers five brightness settings and an auto-off mode, so is always easy to read but never distracting.

Convenience built in

From the 5510's remote control to its multiple output options (pre out and tape), this amplifier is designed to make your listening experience effortless.

Quality that lasts

Built with precision, finished in a timeless black and backed by a three-year guarantee, the 5510 is an amplifier that you will continue to enjoy for years to come.

Technical specifications

Power output	120 Watts per channel into 8 Ohms @ 1kHz
Frequency response	20Hz – 20kHz +/-0.5dB
Signal to noise ratio	>100dB, A weighted ref 1kHz at rated output
Channel separation	>60dB @ 20kHz
Total harmonic distortion	<0.02% at rated power into 8 Ohms ref 1kHz
Mains supply	110/120V or 220/240V @ 50/60Hz (factory set)
Power consumption	<400W, 8 Ohms load, both channels driven
Dimensions (H x W x D)	115mm x 440mm x 300mm
Weight	12kg (net) 14kg (gross)

Pricing & availability

The Exposure 5510 integrated amplifier is available now, priced at £4,600 (incl. VAT).
